

## **Automotive Engineering Show Press Note Chennai, India – September, 2017**

### **Automotive Engineering Show is back in the “Detroit of Asia - Chennai”**

#### **11<sup>th</sup> edition topped up with exclusive live product demos and a seminar highlighting ‘Industrie 4.0 & IIoT’**

India's automotive sector is likely to contribute 12% to India's GDP over the next decade. Chennai also known as the “Detroit of Asia”, is the base to 30% of India's automobile industry and 35% of its auto component industry. Being the epicentre for this sector in India, Chennai has seen a presence of major automobile manufacturing companies making it the most relevant city to host Automotive Engineering Show (AES) 2017.

AES scheduled from 9 to 11 November is one of the most prominent exhibitions dedicated to world class solutions in the automotive sector. The sixth edition of AES Chennai will cover an array of effective engineering solutions that fits suppliers in the automotive manufacturing domain. Product groups that Automotive Engineering Show will largely cover Automotive design and R&D, Automotive inspection and quality control, Automotive paint and finishing as well as Automotive plant equipment and systems.

The companies exhibiting at this show will focus on innovative technologies that optimises the efficiency of work flow for all the automobile manufacturing companies. Some of the well-known brands exhibiting their innovations at the show are Carl Zeiss, CLPA, Nikon, Omron, Olympus, Ingersoll Rand, Ifm Electronic, Tunkers, Panasonic, FARO, Schmalz, Designtech, Amvian Automotive, Alstrut, Advanced Graphic Systems, Dopag, Flir, Fisher, Polyworks, Ellsworth, V R Coatings and Eepos Cranes and so on.

The strong list of exhibitors at the show will enable the O.E.M and auto component manufacturers to source and build business relationships with the sector players from the industry. Leading auto manufacturing players and decision makers from Larson & Toubro, TVS, Ford, Tata Motors, Infosys, Hyundai, Renault Nissan, Maruti Suzuki, BMW, Fiat, Ashok Leyland, Delphi TVS Diesel Systems, Wabco India, Visteon and MRF Limited are expected to visit the fair.

Visitor experience will be further enhanced by a number of activities and workshops that will take place in the 3 day fair. Live sessions with demonstration of products will be held by the exhibitors to make purchase decisions easy. A two day seminar will be held where delegates from the O.E.M sector will be present to share their insights and discuss on the topic “*Industrie 4.0 and IIoT: Opportunities for Indian Automotive Manufacturing*”. Apart from these, visitors can also set up one on one meetings with buyers to discuss long term projects and fulfil individual business needs.

With every company aiming to take the digital and automation route, India sees its future in Industrie 4.0 and IIoT. Automotive Engineering Show supporting digitalisation and innovation, makes itself the most preferred show to source expert quality automotive manufacturing technologies.
