Express Interest

India's logistics sector, integral to trade, shifts focus from transportation to specialized functions, embracing end-to-end planning and analytics. Despite 66% reliance on road transport, the industry's transformation targets 14.4% of GDP, aligning with India's \$26 trillion economy goal by FY48. Challenges persist, but the Economic Times Conclave will discuss disruptive solutions, exploring digitization, sustainable transport, and connected technology for enhanced efficiency in this dynamic landscape.
